DETAILED ACTION

1. Claims 1-6 are pending.

2. Claims 2-3, 5-6 are allowed.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1 and 4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The last four lines are unclear in that the phrase "the input shaft is not driven" is not clear from the instant specification in that the input shaft 31 appears to be sometimes "driven" or brought into a rotating and unrotating (not rotating) states under various conditions as per the instant specification set forth beginning at page 9 under the operation of the electric parking brake mechanism. Clarification is requested.

- 5. Claims 1 and 4 will be allowed upon correction of the claim indefiniteness by correlating the conditions under which the "output shaft" is driven, the "input shaft" is not driven together with the hampering of rotation of the "output shaft" by way of the "cam members". The deleted phrase "operated to move to sides of large diameters" of the cam members should be re-inserted to add clarity along with the other claimed, related structure.
- 6. Applicant's arguments with respect to claims 1 and 4 have been considered but are most in view of the new ground(s) of rejection.

The examiner agrees with applicant that claims 2-3 and 5-6 are patentable.

Art Unit: 3683

7. Any inquiry concerning this communication should be directed to Exmr Butler at telephone number (703) 308-2575.
